

Introducing the Carlson MINI

A field computer that is compact and lightweight, yet tough and resilient

It's RUGGED: Leave it in a hot car or forget it overnight in the depth of winter. Accidentally drop it, get it wet, sit on it – go ahead, don't be careful with it. **The CarlsonMINI will be there for you and come back for more.**

The CarlsonMINI data collector is small, but mighty, and just what surveyors and contractors need in the field:

- Less than 4 1/2 by 7 inches;
- Runs on Windows Mobile 5;
- Lightning-quick processing and wireless connectivity;
- Fits comfortably in one hand and weighs just slightly more than a pound;
- Comes complete with Carlson SurvCE 2.0, the most powerful data collection software on the market today.
- MIL-STD-810F-rated for water, humidity, sand and dust, vibration, altitude, shock, high temperature, low temperature, and temperature shock.
- Featuring a touch screen and a high contrast color display;
- Available in three models:
 - CarlsonMINI 520MHz with Bluetooth,
 - CarlsonMINI 520MHz without Bluetooth,
 - and Carlson MINI 300MHz without Bluetooth.

The CarlsonMINI will be available for delivery beginning in October 2007.

The cost, which includes having Carlson SurvCE2.0 Total Station on board, begins at \$1795 (US).
